Patient Instructions for Accutane

- Prior to starting Accutane, the provider will provide a lab order for bloodwork that will need to be completed to start the medication. Fasting is required for this.
- You will be provided the lab order and a standing order form. The first visit to the lab you will bring the initial order and the standing order. The standing order ensures that you can go to the lab prior to your appointment to get your bloodwork done every month without having to come into our office for a new form.
- In order to continue this program, you will need to be seen every 30-31 days with the provider.
- You will be required to complete a new set of labs every month 1-2 days prior to your next appointment, unless told otherwise by your provider.
- If you have not completed your bloodwork prior to your appointment, a refill will not be sent until we have received them. It is your responsibility to inform our office once you have done them.
