Complete your routine with vegan scalp and hair care.

Hair Serums for Men and Women

Naturally support visible thickness and strength, visibly reduce hair breakage, and replenish nutrients directly at your scalp.³²⁻³⁶

Scalp Microbiome Support

A collection of clinically tested products formulated to support thinning hair by promoting a healthy scalp and defending hair against damage.³ Includes an exfoliating scalp mask, purifying shampoo, protective conditioner, and 2-in-1 shampoo & conditioner for men.

NUTRAFOL

Hair Wellness from Within.®

Clinically tested Nutraceuticals for improved hair growth.

#1 Dermatologist-Recommended Hair Growth Supplement Brand

There's more to hair thinning than genetics alone.†

Hair thinning has multiple root causes—and they affect each of us differently throughout our life stages.

Hormones

An excess amount of the androgen hormone, DHT, can cause hair follicles to shrink—and eventually close.

Stress

Stress can cause hair follicles to shift from a growth state to a rest state while also disrupting hormones and nutrient absorption.

Lifestyle

Your surroundings, the products you use, and the foods you eat can weaken the health of the hair follicle.

Metabolism

Aging and other factors can lead to poor metabolism—which negatively impacts hair cells and energy levels needed for hair growth.

Nutrition

Without proper nutrient absorption, hair follicles don't get the nourishment they need.

Aging

As you age, hair strands become shorter, weaker, and contain less pigment due to the breakdown of collagen and elastin in the scalp.

Standardized vitamins, minerals, and natural ingredients patented for hair growth.†

Featuring Synergen Complex®, a patented blend of phytoactive ingredients in unique ratios to effectively work together and with your body to address key root causes of hair thinning.**

Saw Palmetto

A high concentration of fatty acids that reduces the conversion of testosterone to DHT to improve hair growth.†

Ashwagandha

A high concentration of plant actives derived from the leaves and root that perform stress relieving benefits to reduce hair shedding.†

Tocotrienol Complex

A concentrated form of Vitamin E that improves hair density by reducing environmental stress.†

Curcumin

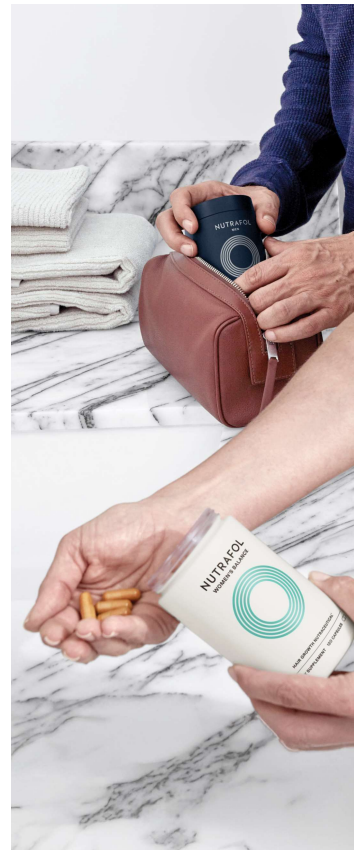

A highly active antioxidant that targets imbalances in the body to support healthy hair.†

Marine Collagen Peptides

Provides the building blocks for strong hair fibers while delivering hydration to the scalp.†

**Ingredients vary by formula to best support your bio-specific needs.

Hair Growth Nutraceuticals address multiple root causes of hair thinning for men and women throughout different life stages and lifestyles.†

	 Nutrafol Women	 Nutrafol Women's Vegan	 Nutrafol Women's Balance	 Nutrafol Postpartum	 Nutrafol Men
